Claim Objections

Claims 1-7 are objected to because of the following informalities:

As to claim 1, lines 16-17, "said first and said second bearing members" lack antecedent basis.

As to claim 2, lines 2-3, "said first and said second developer bearing members" lack antecedent basis.

As to claim 3, line 2, "said rotary member" lacks antecedent basis.

As to claim 4, line 3-4, "the circumferential direction" lacks antecedent basis.

As to claim 4, line 4, "said rotary member" lacks antecedent basis.

As to claim 5, lines 2-3, "said first and second developer bearing members" lacks antecedent basis.

As to claim 6, lines 2-3, "said first and said second developer bearing members" lack antecedent basis.

As to claim 7, line 7, "the recording material" lacks antecedent basis.

As to claim 7, line 10, "said first and said second developer bearing members" lack antecedent basis.

Appropriate correction is required.

Specification

The abstract of the disclosure is objected to because it is not in a single paragraph. Also, in lines 20-21 of page 40 of the abstract, "the first and the second

Art Unit: 2852

bearing members" should be - - the first and the second developer carrying members - -

. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 1-7 are allowed over the prior art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mizuno et al. and Isaka et al. (Japan, 768) disclose art in developing devices.
